Northern Appalachian Transect: Southeastern Quebec, Canada Through Western Maine, U.S.A.; Quebec City to Portland, Maine, July 20 - 26, 1989 (Field Trip Guidebooks)

Published by the American Geophysical Union as part of the Field Trip Guidebooks Series, Volume 358.

This excursion crosses the entire exposed width of the northern Appalachian orogen, from Quebec City, Canada, south to Portland, Maine, a distance of 230 mi (370 km). Because of the great distance and the great complexity of the geology, we decided to focus on specific areas of outstanding interest, rather than attempt to show all that can be seen in the time available. Emphasized throughout are the primary lithologic features that characterize the principal lithotectonic belts shown on Figure 1, which also shows the outlines of the detailed maps for six of the seven days of the excursion. No guide article and detailed map has been prepared for day 3, which is open for several options in Quebec Province near the Maine border.

Thomas Gonzalez:

As a scholar exactly feel bored to reading. If their teacher questioned them to go to the library or make summary for some book, they are complained. Just little students that has reading's spirit or real their interest. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that looking at is not important, boring along with can't see colorful images on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Northern Appalachian Transect: Southeastern Quebec, Canada Through Western Maine, U.S.A.; Quebec City to Portland, Maine, July 20 - 26, 1989 (Field Trip Guidebooks) can make you feel more interested to read.
