# Thermodynamics, Text plus Web: An Integrated Learning System

Philip S. Schmidt, Ofodike Ezekoye, John R. Howell, Derek Baker

**Thermodynamics, Text plus Web: An Integrated Learning System** Philip S. Schmidt, Ofodike Ezekoye, John R. Howell, Derek Baker

What if there were no constraints on the use of photographs and graphics; if books could show objects dynamically to illustrate their multi-dimensional characteristics; and if new and revised material could be added at frequent intervals in response to direct feedback from users? Welcome to *ThermoNet!* Combining a concise text and Web component, *ThermoNet* not only covers standard thermodynamics topics but also enhances learning through interactive animations, tutorials, exercises, and problems.

An integrated learning package that brings thermodynamics to life:

- Developed by engineering educators with partial support from the National Science Foundation.
- Incorporates a Web-based resource where words are used to support visual representations.
- Utilizes graphics-rich environments to help readers gain a strong conceptual understanding of the material.
- Includes an interactive presentation of governing equations that clearly shows the physics underlying each term.
- Focuses the reader's attention on the fundamental principles and motivates them to master the concepts.

**From reader reviews:**

**Floyd Wyatt:**

The knowledge that you get from Thermodynamics, Text plus Web: An Integrated Learning System is the more deep you looking the information that hide inside the words the more you get considering reading it. It does not mean that this book is hard to recognise but Thermodynamics, Text plus Web: An Integrated Learning System giving you joy feeling of reading. The article author conveys their point in certain way that can be understood by anyone who read this because the author of this publication is well-known enough. This specific book also makes your own personal vocabulary increase well. That makes it easy to understand then can go together with you, both in printed or e-book style are available. We highly recommend you for having this kind of Thermodynamics, Text plus Web: An Integrated Learning System instantly.

**Lisa Hegland:**

The particular book Thermodynamics, Text plus Web: An Integrated Learning System will bring that you the new experience of reading some sort of book. The author style to explain the idea is very unique. Should you try to find new book you just read, this book very ideal to you. The book Thermodynamics, Text plus Web: An Integrated Learning System is much recommended to you to see. You can also get the e-book from your official web site, so you can more readily to read the book.

**Gracie Thomas:**

People live in this new day time of lifestyle always aim to and must have the free time or they will get lots of stress from both way of life and work. So , whenever we ask do people have spare time, we will say absolutely without a doubt. People is human not really a huge robot. Then we consult again, what kind of activity do you have when the spare time coming to an individual of course your answer will unlimited right. Then ever try this one, reading guides. It can be your alternative with spending your spare time, the book you have read is Thermodynamics, Text plus Web: An Integrated Learning System.

**Thomas Schwan:**

You can get this Thermodynamics, Text plus Web: An Integrated Learning System by browse the bookstore or Mall. Just simply viewing or reviewing it can to be your solve challenge if you get difficulties for your knowledge. Kinds of this e-book are various. Not only by written or printed but also can you enjoy this book by simply e-book. In the modern era including now, you just looking from your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose suitable ways for you.
