## **Face Detection and Gesture Recognition for Human-Computer Interaction (The International Series in Video Computing)** Ming-Hsuan Yang, Narendra Ahuja

Traditionally, scientific fields have defined boundaries, and scientists work on research problems within those boundaries. However, from time to time those boundaries get shifted or blurred to evolve new fields. For instance, the original goal of computer vision was to understand a single image of a scene, by identifying objects, their structure, and spatial arrangements. This has been referred to as image understanding. Recently, computer vision has gradually been making the transition away from understanding single images to analyzing image sequences, or video understanding. Video understanding deals with understanding of video sequences, e. g. , recognition of gestures, activities, facial expressions, etc. The main shift in the classic paradigm has been from the recognition of static objects in the scene to motion-based recognition of actions and events. Video understanding has overlapping research problems with other fields, therefore blurring the fixed boundaries. Computer graphics, image processing, and video databases have obvious overlap with computer vision. The main goal of computer graphics is to generate and animate realistic looking images, and videos. Researchers in computer graphics are increasingly employing techniques from computer vision to generate the synthetic imagery. A good example of this is image-based rendering and modeling techniques, in which geometry, appearance, and lighting is derived from real images using computer vision techniques. Here the shift is from synthesis to analysis followed by synthesis.

### **From reader reviews:**

#### **Tasha Page:**

Now a day people who Living in the era just where everything reachable by match the internet and the resources included can be true or not involve people to be aware of each info they get. How a lot more to be smart in receiving any information nowadays? Of course the correct answer is reading a book. Examining a book can help men and women out of this uncertainty Information specifically this Face Detection and Gesture Recognition for Human-Computer Interaction (The International Series in Video Computing) book as this book offers you rich facts and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it as you know.

#### **Sandra Bland:**

Many people spending their moment by playing outside with friends, fun activity together with family or just watching TV the entire day. You can have new activity to pay your whole day by looking at a book. Ugh, ya think reading a book can definitely hard because you have to use the book everywhere? It okay you can have the e-book, having everywhere you want in your Cell phone. Like Face Detection and Gesture Recognition for Human-Computer Interaction (The International Series in Video Computing) which is finding the e-book version. So , try out this book? Let's observe.

#### **Laree Drummond:**

In this era which is the greater person or who has ability in doing something more are more treasured than other. Do you want to become considered one of it? It is just simple method to have that. What you are related is just spending your time very little but quite enough to possess a look at some books. Among the books in the top checklist in your reading list will be Face Detection and Gesture Recognition for Human-Computer Interaction (The International Series in Video Computing). This book which is qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking upwards and review this guide you can get many advantages.

#### **Joshua Miner:**

You may get this Face Detection and Gesture Recognition for Human-Computer Interaction (The International Series in Video Computing) by browse the bookstore or Mall. Just simply viewing or reviewing it can to be your solve problem if you get difficulties to your knowledge. Kinds of this book are various. Not only by means of written or printed but can you enjoy this book through e-book. In the modern era just like now, you just looking by your mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose suitable ways for you.
