Following on from the first book entitled 'Conservative treatment of Male Urinary Incontinence and Erectile Dysfunction' this book has been expanded to include seven new chapters and existing chapters have been extensively updated. It is written primarily for those specialist continence physiotherapists who are unsure of the treatment for male patients with lower urinary tract symptoms.

The classification of male urinary incontinence has been restructured in line with the International Continence Society standardisation of terminology. The subjective and objective physiotherapy assessment is covered chronologically, to enable the clinician to conduct a meaningful investigation and arrive at a logical diagnosis.
