Fractions: Multiply and Divide Workbook

Maria Miller

Fractions: Multiply and Divide Workbook Maria Miller

We start out in the fifth grade workbook *Fractions: Multiply and Divide* by simplifying fractions. Since this process is the opposite of making equivalent fractions, it should be relatively simple for students to understand. We also use the same visual model as we would for making equivalent fractions, just backwards: The pie pieces are joined together instead of split apart.

Next comes multiplying a fraction by a whole number. Since this can be solved by repeated addition, it is not a difficult concept at all.

Multiplying a fraction by a fraction is first explained as taking a certain part of a fraction, in order to teach the concept. After that, students are shown the usual shortcut for the multiplication of fractions.

Simplifying before multiplying is a process that is not absolutely necessary for fifth graders. I have included it here because it prepares students for the same process in future algebra studies and because it makes fraction multiplication easier. I have also tried to include explanations of *why* we are allowed to simplify before multiplying. These explanations are actually *proofs*. I feel it is a great advantage for students to get used to mathematical reasoning and proof methods well before they start high school geometry.

Then, we find the area of a rectangle with fractional side lengths, and show that the area is the same as it would be found by multiplying the side lengths. Students multiply fractional side lengths to find areas of rectangles, and represent fraction products as rectangular areas.

Students also multiply mixed numbers, and study how multiplication can be seen as resizing or scaling. This means, for example, that the multiplication $(2/3) \times 18$ km can be thought of as finding two-thirds of 18 km.

Next, we study division of fractions in special cases. The first one is seeing fractions *as* divisions; in other words recognizing that $5/3$ is the same as $5 \div 3$. This of course gives us a means of dividing whole numbers and getting fractional answers (for example, $20 \div 6 = 3 \frac{2}{6}$).

Then students encounter sharing divisions with fractions. For example, if two people share equally $4/5$ of a pizza, how much will each person get? This is represented by the division $(4/5) \div 2 = 2/5$. Another case we study is dividing unit fractions by whole numbers (such as $(1/2) \div 4$).

We also divide whole numbers by unit fractions, such as $6 \div (1/3)$. Students will solve these thinking how many times the divisor “fits into” the dividend.

The last lesson is an introduction to ratios, and is optional. Ratios will be studied a lot in 6th and 7th grade, especially in connection with proportions. We are laying the groundwork for that here.

From reader reviews:

Aline Moran:

Information is provisions for anyone to get better life, information presently can get by anyone with everywhere. The information can be a information or any news even a huge concern. What people must be consider if those information which is in the former life are challenging be find than now's taking seriously which one is acceptable to believe or which one the actual resource are convinced. If you have the unstable resource then you have it as your main information we will see huge disadvantage for you. All those possibilities will not happen inside you if you take Fractions: Multiply and Divide Workbook as the daily resource information.

Lea Severino:

The publication untitled Fractions: Multiply and Divide Workbook is the guide that recommended to you to learn. You can see the quality of the publication content that will be shown to you. The language that publisher use to explained their ideas are easily to understand. The author was did a lot of exploration when write the book, to ensure the information that they share to you is absolutely accurate. You also might get the e-book of Fractions: Multiply and Divide Workbook from the publisher to make you much more enjoy free time.

Lillie Granado:

Playing with family in a very park, coming to see the sea world or hanging out with close friends is thing that usually you will have done when you have spare time, in that case why you don't try issue that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Fractions: Multiply and Divide Workbook, you may enjoy both. It is excellent combination right, you still wish to miss it? What kind of hangout type is it? Oh seriously its mind hangout guys. What? Still don't buy it, oh come on its identified as reading friends.

Neil Nilsson:

That reserve can make you to feel relax. This particular book Fractions: Multiply and Divide Workbook was colorful and of course has pictures on there. As we know that book Fractions: Multiply and Divide Workbook has many kinds or genre. Start from kids until teens. For example Naruto or Investigation company Conan you can read and think you are the character on there. Therefore not at all of book tend to be make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading in which.
