High-Performance Computing Using FPGAs

High-Performance Computing Using FPGAs

High-Performance Computing Using FPGAs

High-Performance Computing using FPGA covers the area of high performance reconfigurable computing (HPRC). This book provides an overview of architectures, tools and applications for High-Performance Reconfigurable Computing (HPRC). FPGAs offer very high I/O bandwidth and fine-grained, custom and flexible parallelism and with the ever-increasing computational needs coupled with the frequency/power wall, the increasing maturity and capabilities of FPGAs, and the advent of multicore processors which has caused the acceptance of parallel computational models. The Part on architectures will introduce different FPGA-based HPC platforms: attached co-processor HPRC architectures such as the CHREC's Novo-G and EPCC's Maxwell systems; tightly coupled HRPC architectures, e.g. the Convey hybrid-core computer; reconfigurably networked HPRC architectures, e.g. the QPACE system, and standalone HPRC architectures such as EPFL's CONFETTI system. The Part on Tools will focus on high-level programming approaches for HPRC, with chapters on C-to-Gate tools (such as Impulse-C, AutoESL, Handel-C, MORA-C++); Graphical tools (MATLAB-Simulink, NI LabVIEW); Domain-specific languages, languages for heterogeneous computing(for example OpenCL, Microsoft's Kiwi and Alchemy projects). The part on Applications will present case from several application domains where HPRC has been used successfully, such as Bioinformatics and Computational Biology; Financial Computing; Stencil computations; Information retrieval; Lattice QCD; Astrophysics simulations; Weather and climate modeling.

From reader reviews:

Dorathy Byers:

Reading a publication tends to be new life style with this era globalization. With reading you can get a lot of information that can give you benefit in your life. Along with book everyone in this world can share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their very own reader with their story or perhaps their experience. Not only the storyplot that share in the publications. But also they write about the data about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors in this world always try to improve their proficiency in writing, they also doing some study before they write to the book. One of them is this High-Performance Computing Using FPGAs.

Denise Welton:

Typically the book High-Performance Computing Using FPGAs has a lot of knowledge on it. So when you read this book you can get a lot of help. The book was written by the very famous author. Mcdougal makes some research previous to write this book. This book very easy to read you will get the point easily after reading this book.

Mary Muncy:

The book untitled High-Performance Computing Using FPGAs contain a lot of information on the item. The writer explains your ex idea with easy technique. The language is very clear to see all the people, so do not really worry, you can easy to read that. The book was compiled by famous author. The author will take you in the new age of literary works. It is easy to read this book because you can keep reading your smart phone, or model, so you can read the book with anywhere and anytime. If you want to buy the e-book, you can open their official web-site and also order it. Have a nice study.

Gale Coachman:

Don't be worry in case you are afraid that this book will certainly filled the space in your house, you can have it in e-book method, more simple and reachable. That High-Performance Computing Using FPGAs can give you a lot of friends because by you investigating this one book you have point that they don't and make anyone more like an interesting person. This kind of book can be one of a step for you to get success. This publication offer you information that maybe your friend doesn't learn, by knowing more than various other make you to be great folks. So , why hesitate? We need to have High-Performance Computing Using FPGAs.
